ARPM

The ARPM curriculum provides risk pool managers and prospective risk pool managers with theoretical and practical knowledge needed to successfully manage the risk pool.

The Curriculum:

Most of the curriculum for ARPM is provided through existing IEA/IIA certification programs (ARM, Associate in Risk Management) with additional training in the practical aspects of risk pool management provided through the California Association of Joint Powers Authority (CAJPA).

Program Highlights:

-  Up-to-the-minute curriculum from IEA and The Institutes
-  Practical tools from the experts in risk pool management
-  Active mentoring for students
-  Final thesis focused on topics within the risk pool environment

Earning the Designation:

Because this program is developed and maintained by IEA and CAJPA, the designation is expected to have great value and credibility in the risk pool community. The program is largely self-directed and many modules are available in online as well as classroom format. The designation will benefit Risk Pool managers at all levels, aspiring risk pool managers, insurance industry personnel and service providers.
